September 25, 2012

To Our Pitt Students, Corporate Sponsors, and Members of the Business Community,

As Chancellor of the University of Pittsburgh, I would like to welcome you to the University's Fall 2012 Career Fair. We are pleased that nearly 200 employers have come to Pitt to discuss career opportunities with our students.

Your visit to our campus comes during a very special year for the University of Pittsburgh as we commemorate the 225th anniversary of our founding as a log cabin academy on the edge of the American frontier. The progress we have made over the course of our 225-year history has been extraordinary. This past year was no exception and was a year which was characterized by high performance and remarkable progress at Pitt.

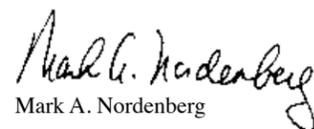

Over the course of our more recent history, Pitt has become a global powerhouse of pioneering research. In fact, this year, when the National Science Foundation released its annual listing of American universities by total federal science and engineering research and development support, Pitt was in the top five—along with Johns Hopkins and the Universities of Washington, Michigan, and Pennsylvania.

It was a year that saw inspiring examples of individual accomplishment emerge from within the University. It was also a year in which key measures of institutional progress continued their dramatic climb. And Pitt students contributed to that progress in a number of ways—from their commitment to their own academic achievement to their contributions to the community through numerous volunteer activities. Our students sit at the top of the list of reasons why our faculty and staff are so deeply committed to the work that is done here. Pitt students top that list not only because of our respect for what they have achieved inside and outside the class room during their collegiate experience but because of our belief in their potential.

This University is fortunate to attract highly talented students who know that they need to perform at the highest levels if they are to achieve their full potential. This past year, Pitt students were selected for such honors as Rhodes, Udall and Goldwater Scholarships and for Whitaker and National Science Foundation Fellowships. But it is not just those students earning the highest forms of national recognition who are true achievers. Day after day, tens of thousands of Pitt students are more quietly crafting records of accomplishment as they build the educational foundation from which they will pursue their dreams and go on to build careers of impact.

To the employers who are here today, thank you for coming to our campus to meet our students. We are glad you are here. To our students, my best wishes to you as you begin the process of launching the next phase of your life after Pitt.

Sincerely,

  
Mark A. Nordenberg

Senior Vice Chancellor*

Dear Job Seekers and Employers:

Welcome to the University of Pittsburgh Fall 2012 Career Fair at the Petersen Events Center. We are delighted that you are taking part in this annual event today that will connect nearly 200 businesses, organizations, and graduate schools with the many talented students from the University of Pittsburgh.

It is exciting to bring recruiters representing such a variety of career opportunities in many different professions and geographic locations, from such a diverse range of industries, to our campus today to meet with our extraordinary students. We are very proud of our students because we strongly believe that they possess many attributes that will make them exceptional employees. First and foremost, our students have earned a degree from a world-class University that continues to grow in stature as one of the top research universities in the country and one of the top public universities in the world. Pitt students obtain significant experiences outside the classroom, with more than three-fourths of our graduating seniors participating in a practicum, internship, co-op, clinical work, and/or a research project.

University of Pittsburgh students are trained to become proficient communicators and bring a global perspective to the marketplace, as well as a deep understanding and respect for diversity of ideas, cultures, and people. The University embraces the philosophy that "the city is our campus" and provides an array of rich experiences to raise the cultural and social awareness of our students—made possible by our dynamic urban setting in one of America's great cities.

We are confident that many careers will be launched today as we match such a diversified pool of prospective employees and such an outstanding collection of quality employers. I would like to thank the corporate sponsors of today's event and extend appreciation to the Career Development Office and the Student Employment and Placement Assistance Office here at the University. Countless students and employers have benefitted from the services these entities provide.

We wish you all the best in your recruiting and job search endeavors.

Sincerely,

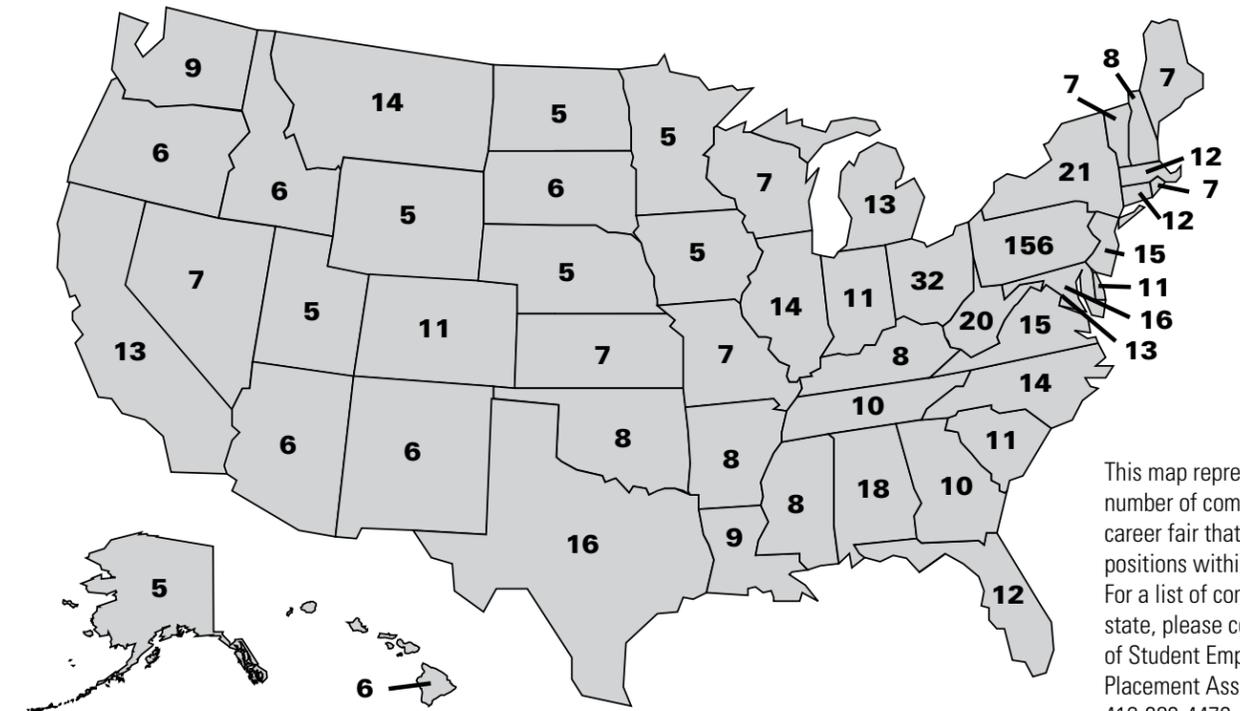

Patricia E. Beeson  
Provost and Senior Vice Chancellor
